SIR:

Responsive to the Official Action dated May 16, 2002, please amend  
the above-identified application as follows:

CLAIMS:

Please replace claims 4, 6, 7, 13 and 17 with the following amended  
claims:

- 1 4. (As Amended) An optical display/apparatus, comprising a  
2 hologram device and a light source, wherein the hologram device is a reflection-  
3 type hologram formed by:  
4 light having information of an object incident on a first hologram dry  
5 plate; and  
6 reference light incident on the first hologram dry plate with an  
7 incident optical path different from that of the light having the information of the  
8 object, wherein  
9 a reconstructed image of the object is displayed by light from the  
10 light source which is incident on the reflection-type hologram through an  
11 elongated opening arranged such that the light diffuses in only the width direction  
12 of the reflection-type hologram, and wherein
